What is Electrical Discharge Machining?

Electrical discharge machining (EDM) is a non-traditional and precise manufacturing process that uses electricity instead of a cutting tool to remove materials from a workpiece. EDM is best for extremely precise parts such as, coinage dies, medical devices, and jet engine turbines.

There are three types of EDM machining, Wire, Sinker, and Hole

Drilling. Wire EDM machines use a wire electrode to produce a desired contour or shape and is very precise. Sinker EDM machines use an

electrode that has the same shape as the desired feature and has the ability to create blind holes or cavities in a part. Hole Drilling EDM machines use a conductive tube as the electrode and has the ability to drill precise and accurate holes on exotic and hard metals. The advantages of using EDM machining is that it provides for greater accuracy, can develop extremely complex designs, has an amazing surface finish, can be used on a wide range of workable materials, and is a completely non-contact process.

Are peanuts really a nut?

That's so

Nuts

All you need to know!

What is a nut?

Nuts are fruits that made of a hard outer shell surrounding an edible kernel.

Most Common Nuts

RANK	NAME	CONSUMPTION
1	Peanut	42,596,000
2	Almond	1,188,687
3	Walnut	888,672

Nutrients

Nuts are healthy low-calorie foods which contain many beneficial nutrients, unsaturated fats and minerals.

- B Vitamins
- Iron
- Calcium
- Vitamin E
- Magnesium
- Folate

NOW HIRING

- CMM Programmer, 1st Shift, Experienced
- CNC Machining Center Operator, 1st or 2nd Shift, Experienced
- Wire EDM Setup, All Shifts, Experienced
- Wire EDM Operators, All Shifts, Will Train
- Conventional EDM Setup, 1st or 2nd Shift, Experienced
- Conventional EDM Operators, 2nd or 3rd Shift, Experienced

Adron Tool Corporation
Supervisor

Kim Witz

Meet Kim Witz, an exceptional Supervisor at Adron Tool Corporation.

With unwavering commitment, expertise in production processes, and inspiring leadership, Kim ensures high-quality products and sets industry standards. Her remarkable work ethic consistently exceeds expectations, making her an invaluable asset to the company.

Shift Supervisor
Kim Witz

IMMEDIATE HIRE:

Conventional/Sinker
EDM Setup Technician
– 2nd Shift & 3rd Shift

- Setup and operation of our state of the art Conventional EDM machines
- Manufacture and redressing of electrodes using tool room equipment
- Read and interpret blueprints and related technical data to determine tooling requirements, setup procedures, etc.
- Determine and adjust machine parameters to maximize machining efficiency
- Communicate with all necessary staff as to procedures and job status
- Monitor and measure work pieces for conformance to specifications, using inspection instruments
