

Learning Plan 3
Performance Assessment Task 2
Software: Student Choice Project

Competencies: Analyze emerging web trends

Directions to Learners:

The choice of project focus is up to you as long as it is involving the use of AI and the Web Designer/Developer field.! AI involves using software that is new, emerging or trending and we are interested in trying something out that can use it and be applied in the field of web site design and development.

The project has to focus on something you have not done before, it is an opportunity to focus your attention and time on something you find intriguing and want to learn more about.

You will create a web page to add to your final project site that contains the required documentation for this project. There should be a link on that page to the demonstration of your project of choice if appropriate.

You will provide the required documentation as outlined on the Scoring Guide.
 You will submit the URL to the required documentation in the Drop Box.

Scoring Guide: Grading Criteria

Criteria	Values
Innovation and expansion of skills are demonstrated in project. Documentation: Describe how this was innovative and went beyond your current skill level. Convince the reader of this! Remember the Scoring Rating Scales Key below!! I was innovative in not only in restyling the tutorial, but in the figuring out how to get the code I added into the tutorial code to work well on all devices. Media queries were absolutely needed to make the webpage responsive. I decided to add an animated Gif in the background which I have never tried before, and I was surprised at how simple that was. I also changed the colors, text size, font style, and added an image. It may look pretty simple, but it took me a lot longer to code than I thought, especially in the area of getting the webpage to be responsive.	10 8 6 0
Skills demonstrated in project are documented in a tutorial. Documentation: You will provide documentation of the project you completed in a method that would allow for someone to use the documentation to try doing the same thing or learning the same skill. This can be a written tutorial, a video demonstration, or combination of such. The tutorial is on my webpage as a PDF. URL: https://tracywitz.com/speech/text.html	10 8 6 0
Project and code are 100% functional when viewed in at least one browser with page meeting web coding and design standards.	10 8 6 0

Emerging Web Technology and Trends (MPTC/152-117)

Documentation: State the browser to be used to view your project. Describe the testing done. Describe how you incorporated web standards and design standards learned in your course of study into this project. I used Visual Studios that will help you view your project using Port: 5500 on the Google Chrome Browser. Web standards and design standards incorporated in this project are that the webpage is consistent, responsive, and the code has been validated.	
Reflection includes description of sources used, difficulties encountered, and skills gained. Documentation: Include a reflection statement that address all three areas listed in the criteria. The resource I used is from Codepen. I did not encounter any difficulties with using the tutorials code supplied by Codepen, I did however encounter difficulties when I added my own code, primarily with the webpage being responsive. I needed to add media queries, and it took me a long time to get it right; so, I gained skills in media queries. URL: https://codepen.io/lonekorean/pen/PozMjgO	5 4 2 0
TOTAL:	35
Scoring Rating Scales Key: First Point Value = Criteria Fully Met: Exceeded Requirements Second Point Value = Criteria Met: Minimum Requirement Levels (no redo required) Third Point Value = Criteria needs improvement –redo required Fourth Point Value = Criteria not present, not met	

Core Abilities Scoring Guide

Criteria	Values	
Key: yes = 2 pts. no = 0 pts.		
Think Critically and Creatively: Learner synthesizes information from a variety of sources	yes	no
Communicate Clearly: Learner will apply standard rules of language structure including grammar, spelling, and punctuation	yes	no
Learn Effectively: Learner shows initiative and is resourceful in finding supplemental learning materials and exam	yes	no
Act Responsibly: Learner completes tasks according to prescribed deadlines	yes	no
